This document consists of **20** printed pages.

**Scenario 1**  
**Questions 1 and 2**

St Dennis Medical Centre employs a number of doctors who are often called out to visit patients in their homes. When this happens they may need remote access to the central computer system at the main hospital as well as the system at their own medical centre. This will allow them to access patients' records during house calls.

From time to time it is necessary for a doctor to consult with other doctors when they are away from the medical centre.

- 1 (a) Describe **two** items of hardware that a doctor could use in order to access the records remotely. Explain how each is used.

**Scenario 2**  
**Question 3**

Cairo Press is a group of Egyptian book publishers who are looking to expand their operations. The group wishes to increase their advertising to extend their customer base. Cairo Press' preferred method of advertising would be by using a website. The employee who has been asked to design the website has access to a standard PC, keyboard and mouse. Cairo Press will purchase any additional equipment which might be needed.

- 3 (a) Describe the additional hardware which would be needed, and how it would be used in the creation of the website.

**Scenario 3**  
**Questions 4 and 5**

Windscale is a national chain of banks in the UK. They have had a computer system for many years to manage customer accounts and also the payroll of their employees.

They have a website for their customers, who can do all their banking online.

They are concerned that their system is not as secure as it might be. At the moment customers are only required to type in a username and a password to access their accounts.

Many bank workers in the existing branches use computers all day. The working patterns of some employees have been affected by the introduction of online banking.

- 5 (a) Health and safety problems may occur because of the bank workers' continual use of computers.

For  
Examiner's  
Use

Describe how these problems can be reduced.

**Scenario 4**  
**Questions 6, 7 and 8**

Dar Es Salaam High School has recently been formed by the amalgamation of six smaller schools. The head teacher wants to have a modern central ICT system to administer student records. This system will need to be ready when the students attend a single campus. She has decided to employ a systems analyst to look at the existing computer systems in the six schools and recommend a new system.

She wants to keep student records on file which will include the following:

- the student id number of 12 digits
- test scores
- their form groups

**(b)** At the Design stage of the systems life cycle he will need to decide on the validation checks to be used.

*For  
Examiner's  
Use*

Describe **three** validation checks which would be used with the student id number.
