BUSINESS 9609/12

Paper 1 Short Answer/Essay

October/November 2018

MARK SCHEME
Maximum Mark: 40

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2018 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit
 is given for valid answers which go beyond the scope of the syllabus and mark scheme,
 referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Marks are awarded for each answer when the following Assessment Objectives (AO) are met. The mark scheme for each answer indicates when and how each AO can be met.

AO1 – Demonstrate knowledge and understanding of business concepts.

The focus in <u>Section A</u> of the Examination Paper is on this first AO.

- (a) **Questions 1**, **2**, and **4** will meet this AO using definitions and explanations of business concepts.
- (b) **Question 3** provides an opportunity for the application and a more developed explanation of a business concept. The 4–5-mark level specifically provides for this more developed explanation.

In Section B of the Examination Paper

(a) Questions 5, 6, and 7 still require supporting Knowledge and Understanding (AO1), but there is now a focus on Application (AO2), Analysis (AO3), and Evaluation (AO4). These skills are set out below:

AO2 – Apply knowledge and understanding of business concepts to general and specific situations and contexts.

- (a) Where a specific business or context is named in the question then the candidate is required to relate answers specifically to this business or context.
- (b) It is not sufficient to merely repeat the name of the business or the context.

AO3 – Analyse business problems, issues, situations and contexts, through a discussion and interpretation of evidence, debate, theory, impact and consequence, to produce reasoned and coherent arguments.

(a) Level 3 answers will likely use terms such as – because, leads to, therefore, so that, as a result, consequently – thereby showing analytical development for AO3.

AO4 – Limited Evaluation is given

- (a) When an attempt is made, (probably in a concluding section of an answer), to address and comment on the value and validity of the previous analysis.
- (b) These comments may be quite brief and be more opinionated than reasoned.
- (c) A mere concluding summary of preceding analysis is, however, not evaluation.

AO4 - Evaluation occurs

- (a) When an answer comments on the validity/significance of previous analysis in an evidence based and reasoned way.
- (b) This often leads to the presentation of appropriate substantiated judgements, decisions, or recommendations.

Question	Answer	Marks
3	Explain how a large manufacturing business could finance investment in new machinery.	
	 Answers could include: The context suggests a significant amount of capital investment. It depends on the assumptions made about the existing financial position of the business – has it significant retained earnings? – has it assets to sell? Internal sources may be limited and insufficient to finance all the expenditure required. Externally the following might be sources of finance:– – Equity finance if a plc. – Bank loans. – Government grants. – Hire purchase/leasing. 	
	Effective explanation of relevant sources of finance with clear reference to the context of a large manufacturing business/new machinery (4–5 marks) Limited explanation of source(s) of finance for purchasing of capital equipment (2–3 marks) Understanding of source(s) of business finance (1 mark) No creditable content (0 marks)	

Question	Answer	Marks	
4(a)	Define the term 'value added'.		
	Value added can be defined as:		
	 the amount by which the value of a product/service is increased during the production process (2), or the difference between the price of a finished product/service and the cost of the inputs involved in producing it (2). 		
	Sound definition – as the two examples above (2 marks) Partial definition – correct reference only to the cost of inputs, or reference only to the price of finished product/services. (1 mark) No creditable content. (0 marks)

October/November 2018

Question	Answer	Marks
6	Evaluative comments might discuss questions such as who the dominant stakeholders are and what the dominant business objectives are. The answer may well depend on stakeholder perceptions of what is best for the business / society in short and long term. Stronger evaluation may mention the influence of social/political pressure for more ethical and socially responsible business activity, which could give stakeholders little choice in the matter, or the influence of the business cultures in individual countries, or the stage of economic development in different countries.

Question	Answer	Marks
7(b)	Evaluative comments may include: It may not be appropriate to take knee jerk action in response to competitor actions. A reduction in competitor price may be temporary and the brand strength of the car manufacturer may be strong enough to resist the price reduction. It may well depend on the strength and agility of the company and its operational management department. An operations management department does not have to wait for threatening competitor activities or actions. An innovative operations management department might well be ahead of competitors having taken decisions for new investment/new quality models that put competitors on the back foot and /or it continually and effectively monitors competitors so preventing any surprising or threatening competitor actions.
