UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2011 question paper for the guidance of teachers

9702 PHYSICS

9702/43

Paper 4 (A2 Structured Questions), maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	GCE AS/A LEVEL – May/June 2011	9702	43

Section A

- 1 (a) region (of space) where a particle / body experiences a force B1 [1]
 - (b) similarity: e.g. force $\propto 1 / r^2$ potential $\propto 1 / r$ B1 [1]
 - difference: e.g. gravitation force (always) attractive B1 electric force attractive or repulsive B1 [2]
 - (c) either ratio is $Q_1Q_2 / 4\pi\epsilon_0 m_1 m_2 G$ C1 = $(1.6 \times 10^{-19})^2 / 4\pi \times 8.85 \times 10^{-12} \times (1.67 \times 10^{-27})^2 \times 6.67 \times 10^{-11}$ C1 = 1.2×10^{36} A1 [3] or $F_E = 2.30 \times 10^{-28} \times R^{-2}$ (C1) $F_G = 1.86 \times 10^{-64} \times R^{-2}$ (C1) $F_E / F_G = 1.2 \times 10^{36}$ (A1)
- 2 (a) amount of substance M1 containing same number of particles as in 0.012 kg of carbon-12 A1 [2]
 - (b) pV = nRT C1 $amount = (2.3 \times 10^5 \times 3.1 \times 10^{-3}) / (8.31 \times 290)$ $+ (2.3 \times 10^5 \times 4.6 \times 10^{-3}) / (8.31 \times 303)$ C1 = 0.296 + 0.420 C1 $= 0.716 \, \text{mol}$ A1 [4] (give full credit for starting equation pV = NkT and $N = nN_A$)
- 3 (a) charges on plates are equal and opposite M1 so no resultant charge A1 energy stored because there is charge separation B1 [3]
 - (b) (i) capacitance = Q/V C1 = $(18 \times 10^{-3})/10$ = $1800 \ \mu F$ A1 [2]
 - (ii) use of area under graph or energy = $\frac{1}{2}CV^2$ C1 energy = $2.5 \times 15.7 \times 10^{-3}$ or energy = $\frac{1}{2} \times 1800 \times 10^{-6} \times (10^2 7.5^2)$ A1 [2]
 - (c) combined capacitance of Y & Z = $20\,\mu\text{F}$ or total capacitance = $6.67\,\mu\text{F}$ C1 p.d. across capacitor X = 8V or p.d. across combination = 12V C1 charge = $10\times10^{-6}\times8$ or $6.67\times10^{-6}\times12$ = $80\,\mu\text{C}$ A1 [3]
