

**MARK SCHEME for the October/November 2010 question paper  
for the guidance of teachers**

**0452 ACCOUNTING**

**0452/23**

Paper 2, maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	<b>IGCSE – October/November 2010</b>	<b>0452</b>	<b>23</b>

- 2 (a)** Bank 2 January 2010  
Explanation Lynda Chomba has invested additional capital and the money has been paid into the business bank account **(2)**  
Double entry debit bank column in cash book **(1)**
- Purchases 30 September 2010  
Explanation Lynda Chomba has taken goods from the business for her own use **(2)**  
Double entry credit purchases account **(1)**
- Loss for the year  
(net loss) The expenses of the business exceeded the gross profit so the business has made a loss **(2)**  
Double entry credit income statement (profit and loss account) **(1)** [9]
- (b)** The balance represents the amount of Lynda Chomba's capital at the end of the financial year/at the start of the new financial year. **(1)**  
This is the amount the business owes Lynda Chomba at that date. **(1)** [2]
- (c) (i)** The business entity principle makes a distinction between the financial transactions of a business and those of its owner(s). **(2)**  
**Or**  
The business is treated as being completely separate from the owner(s) of the business. **(2)** [2]
- (ii) Either**  
The owner's capital is shown as a credit balance representing an amount owed by the business  
**Or**  
The goods withdrawn for personal use are debited to the account reducing the amount the business owes the owner  
**Or**  
The loss for the year is debited to the account reducing the amount the business owes the owner  
*Any 1 example (1)* [1]
- (d)** Duality [1]
- (e)** Money measurement [1]
- (f)** Work can be shared amongst several people  
Easier for reference as the same type of accounts are kept together  
Easier to introduce checking procedures  
*Or other suitable point*  
*Any 2 points (1) each* [2]

<b>Page 8</b>	<b>Mark Scheme: Teachers' version</b>	<b>Syllabus</b>	<b>Paper</b>
	<b>IGCSE – October/November 2010</b>	<b>0452</b>	<b>23</b>

5 (a) (i) Sales = cost of sales + gross profit =  
 $340\,000 + 85\,000 = 425\,000$  (1)

Gross profit as % of sales =  $\frac{85\,000}{425\,000} \times \frac{100}{1}$  (1) = 20.00% (1) O/F

[3]

(ii) Profit for the year (net profit) = gross profit – expenses =  
 $85\,000 - 49\,000 = 36\,000$  (1)

Profit for the year (net profit) as % of sales =  
 $\frac{36\,000}{425\,000} \times \frac{100}{1}$  (1) = 8.47% (1) O/F

[3]

(iii) Return on capital employed (ROCE)  
 $\frac{36\,000}{330\,000} \times \frac{100}{1}$  (1) = 10.91% (1) O/F

[2]

- (b) (i) Percentage of gross profit to sales  
This measures the success in selling goods  
The ratio shows the gross profit earned per \$100 of sales  
The ratio can be compared with previous years  
The ratio can be compared against other businesses  
Mark Ukata has spent 80% (O/F) of the sales income on the cost of goods

*Or other relevant explanation*

*Any 3 points (1) each*

[3]

- (ii) Percentage of profit for the year (net profit) to sales  
This measures the overall success of the business  
The ratio shows the net profit earned per \$100 of sales  
The ratio can be compared with previous years  
The ratio can be compared against other businesses  
The ratio indicates how well the business controls its expenses  
Mark Ukata has spent 11.53% (O/F) of the sales income on expenses

*Or other relevant explanation*

*Any 3 points (1) each*

[3]

- (iii) Return on capital employed (ROCE)  
The ratio shows the profit earned per \$100 employed in the business  
The ratio can be compared with previous years  
The ratio can be compared against other businesses  
The ratio measures the profitability of the investment in the business  
The ratio shows how efficiently the capital is being employed

*Or other relevant explanation*

*Any 3 points (1) each*

[3]

<b>Page 9</b>	<b>Mark Scheme: Teachers' version</b>	<b>Syllabus</b>	<b>Paper</b>
	<b>IGCSE – October/November 2010</b>	<b>0452</b>	<b>23</b>

- (c) Cost is the actual purchase price plus any additional costs incurred in bringing the inventory (stock) to its present condition and position. **(1)**

Net realisable value is the estimated receipts from the sale of the inventory (stock), less any costs of completing or selling the goods. **(1)** [2]

- (d) Inventory (stock) should always be valued at the lowest of cost and net realisable value. **(1)**  
 This is an application of the principle of prudence. **(1)**  
 Over-valuing inventory (stock) causes both the profit for the year and the current assets to be incorrect. **(1)**

*Or other relevant explanation*

*Any 2 points (1) each* [2]

- (e)

	Overstated	Understated
Cost of sales	✓ <b>(1)</b>	
Gross profit		✓ <b>(1)</b>
Profit for the year (Net profit)		✓ <b>(1)</b>

[3]

- (f) Reduce (inventory) stock levels  
 Generate more sales activity  
 Only replace inventory (stock) when needed

*Or other suitable point*

*Any 2 points (1) each* [2]
