- 6 Amina is considering purchasing new equipment at a cost of \$80 000 to replace her existing machinery which has been fully depreciated.

She has produced the following summarised income statement for the year ended 31 August 2014.

Summarised Income Statement
for year ended 31 August 2014

	\$
Revenue	95 000
Cost of production	<u>60 000</u>
Gross profit	35 000
Other costs	<u>25 000</u>
Profit for the year	<u>10 000</u>

The cost of production includes \$5000 for repairs to the existing equipment. The new equipment would reduce the cost of repairs by 80%.

Equipment is depreciated at the rate of 10% per annum on a straight line basis.

In order to fund the purchase of the new equipment Amina would require a long term loan of \$80 000 at an interest rate of 4% per annum.

Amina expects to increase her selling price by 10% as a result of buying this machine. It is expected that costs would not increase.

- (a) Prepare a revised income statement for the year ended 31 August 2014 showing the effect on the profit if Amina goes ahead and purchases this new equipment.
