	Paper 3 (Core)		October/Nove	mber 2015
				2 hours
N	Candidates answer on	the Question Paper.		
874*	Additional Materials:	Electronic calculator Tracing paper (optional)	Geometrical instruments	
	READ THESE INSTRU	ICTIONS FIRST		

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use an HB pencil for any diagrams or graphs. Do not use staples, paper clips, glue or correction fluid. DO **NOT** WRITE IN ANY BARCODES.

Answer **all** questions.

If working is needed for any question it must be shown below that question. Electronic calculators should be used.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place. For π , use either your calculator value or 3.142.

At the end of the examination, fasten all your work securely together. The number of marks is given in brackets [] at the end of each question or part question. The total of the marks for this paper is 104.

The syllabus is approved for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.

This document consists of **15** printed pages and **1** blank page.

- 1 (a) 120 children take part in an athletics competition.
 - (i) Complete the table to show the number of children in each group.

	Girls	Boys	Total
Age 15			65
Age 16	44		
Total	70		120

(ii) One child is selected at random.

Find the probability that it is a girl aged 16. Give your answer as a fraction in its lowest terms.

[2]

(iii) Write down the ratio number of girls aged 15: number of boys aged 15. Give your answer in its simplest form.

Answer(a)(iii) [2]

(b) Here are the distances, in metres, recorded in the boys' shot putt.

9.23 6.21 9.86 8.64 7.15 7.72 9.01 7.34 6.53 6.89

(i) Find the median.

Answer(b)(i) m [2]

(ii) Find the range.

- *Answer(b)*(ii) m [1]
- (iii) Another boy was a late entry to the competition. After his attempt, the range increased by 20 cm.

Work out the two possible distances of his attempt.

Answer(b)(iii) m or m [2]

- 2 (a) Write down a number between 20 and 30 that is
 - (i) a multiple of 6,
 - Answer(a)(i)
 [1]

 (ii) a square number,
 [1]

 (iii) a cube number,
 [1]

 (iv) a prime number.
 [1]
 - *Answer(a)*(iv) [1]

(b) Find

(c) (i) Write 84 as a product of its prime factors.

Answer(c)(i)	[2]	1
	L-	L

(ii) Find the highest common factor (HCF) of 84 and 126.

- 3 (a) Luis buys a season ticket to watch his local football team. The season ticket costs \$595.
 - (i) Luis buys the season ticket online and gets a 5% discount on the \$595.

Work out how much Luis pays for the season ticket online.

Answer(a)(i) \$......[2]

(ii) A ticket to watch one match costs \$38. Luis watches 16 matches.

How much did Luis save by buying a season ticket online instead of 16 tickets at \$38 each?

Answer(a)(ii) \$.....[2]

(b) The football stadium has 26272 seats. The number of people who attend one match is 23854.

Calculate the percentage of the 26272 seats that are **empty**.

Answer(b)% [2]

(c) The total number of people attending matches at the stadium last season was 506762.

Write 506762 in standard form, correct to 3 significant figures.

(d) Last season the team played a total of 45 matches. The table shows the results of these matches.

Result	Number of matches	Pie chart sector angle			
Won	20	160°			
Drawn	15				
Lost	10				

- (i) Complete the table.
- (ii) Complete the pie chart.

(e) The table shows the total attendance figures for all the teams in the league for two seasons.

Season	Total attendance		
A	9.76×10^{6}		
В	1.36×10^{7}		

Work out how much greater the attendance was in season B than in season A. Give your answer in standard form.

Answer(e) [2]

[3]

[1]

- 4 Three friends are going on holiday. They travel by plane.
 - (a) Ahmed's suitcase has mass *m* kilograms.
 - (i) The mass of Sonia's suitcase is 5 kg more than the mass of Ahmed's suitcase.

Write down an expression, in terms of *m*, for the mass of Sonia's suitcase.

	<i>Answer(a)</i> (i)kg [1]
(ii)	The mass of Hala's suitcase is twice the mass of Ahmed's suitcase.
	Write down an expression, in terms of <i>m</i> , for the mass of Hala's suitcase.
	<i>Answer(a)</i> (ii)kg [1]
(iii)	The total mass of the three suitcases is 47 kg.

iii) The total mass of the three suitcases is 47 kg

Write down an equation in terms of m.

(iv) Solve your equation and find the mass of each suitcase.

Answer(a)(iv) Ahmed's suitcase		kg
--------------------------------	--	----

- Sonia's suitcase kg
 - Hala's suitcase kg [3]

- (b) Each friend carries one bag of hand luggage onto the plane.
 - (i) The rule for the maximum size of each bag of hand luggage is

length + width + height $\leq 115 \, \text{cm}$.

The measurements of Ahmed's bag are shown in the table.

Length	Width	Height		
550 mm	395 mm	200 mm		

Can Ahmed carry this bag onto the plane? Explain your answer.

Answer(b)(i) because

(ii) The mass of Ahmed's bag is 5 kg, correct to the nearest kilogram.

Write down the upper bound of the mass of his bag.

Answer(b)(ii) kg [1]

- (c) The friends change money from dollars into euros (\in) to spend on holiday. The exchange rate is $1 = \in 0.68$.
 - (i) Sonia changes \$150 into euros.

Work out how many euros she receives.

Answer(c)(i) \in [1]

(ii) Hala pays $\notin 25.50$ for a meal.

Work out how much this is in dollars.

Answer(c)(ii) \$.....[2]

5 The scale drawing shows two villages, *A* and *B*, joined by a straight road. The scale is 2 centimetres represents 1 kilometre.

Scale: 2 cm to 1 km

9

(a) (i) Work out the distance, in kilometres, from *A* to *B*.

	Answer(a)(i) km	[2]
	(ii) Measure the bearing of B from A .	
	Answer(a)(ii)	[1]
(b)	Another village, C, is 3.2 km from A on a bearing of 310° .	
	Mark and label the position of <i>C</i> on the diagram.	[2]
(c)	In this part use a straight edge and compasses only and show your construction arcs clearly.	
	Construct the perpendicular bisector of <i>AB</i> .	[2]
(d)	A school is	
	• closer to village A than to village B and	
	• less than 3 kilometres from village <i>B</i> .	
	On the diagram, shade the region in which the school must be.	[3]
(e)	Nelson cycles from village <i>B</i> to the nearest town. He cycles a total distance of 12 km at an average speed of 15 km/h . He leaves village <i>B</i> at 1015.	
	Work out the time he arrives at the nearest town.	

- 6 Irina has some solid building blocks.
 - (a) Write down the mathematical name of this solid.

Answer(a) [1]

(b) Irina describes the shape of a different block. She says:

It has 12 edges and 8 vertices. All the faces are the same shape.

Write down the mathematical name of this solid.

Answer(b) [1]

(c) The diagram shows the end face of another block.

(i) Show that BC = 5.2 cm, correct to 1 decimal place.

Answer(c)(i)

(ii) Find the area of triangle *ABC*.

Answer(c)(ii) cm² [2]

(iii) This block is a triangular prism with length 8 cm.

Calculate the volume of the block.

Answer(c)(iii) cm^3 [1]

(d) The diagram shows another building block.

(i) Calculate the area of the end face of this block.

Answer(d)(i) cm^2 [2]

(ii) The volume of this block is $336 \,\mathrm{cm}^3$.

Find the value of *x*.

 $Answer(d)(ii) x = \dots$ [1]

7 (a) The table shows some values of $y = \frac{6}{x}$.

x	-5	-4	-3	-2	-1	1	2	3	4	5
У	-1.2	-1.5				6		2	1.5	1.2

- (i) Complete the table.
- (ii) On the grid, draw the graph of $y = \frac{6}{x}$ for $-5 \le x \le -1$ and $1 \le x \le 5$.

(iv) Find the co-ordinates of the point where the line y = 4 crosses the graph of $y = \frac{6}{x}$.

Answer(a)(iv) (.....) [1]

[4]

[1]

 $Answer(b)(iii) y = \dots [2]$

(i) Write down the order of rotational symmetry of this shape.

Answer(a)(i) [1]

[2]

(ii) Draw the lines of symmetry on the shape.

(b)

9 (a) Expand and simplify.

$$2(3x+2) - 4(x+1)$$

(b) Factorise completely. $3y^2 - 6y$

(c) Make *b* the subject of the formula. $a = \frac{b}{4} - 5$

 $Answer(c) \ b = \dots \qquad [2]$

(d) Solve the simultaneous equations. You must show all your working.

$$3x + 2y = 11$$
$$6x - y = 32$$

 $Answer(d) x = \dots$

y = [3]
