

Cambridge International Examinations

Cambridge International General Certificate of Secondary Education

	CANDIDATE NAME		
	CENTRE NUMBER		CANDIDATE NUMBER
*			
5 6	CAMBRIDGE IN	NTERNATIONAL MATHEMATICS	0607/21
6	Paper 2 (Extend	ded)	October/November 2014
6 6			45 minutes
6 6	Candidates ans	wer on the Question Paper.	
743	Additional Mater	rials: Geometrical Instruments	

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

Do not use staples, paper clips, glue or correction fluid.

You may use an HB pencil for any diagrams or graphs.

DO NOT WRITE IN ANY BARCODES.

Answer all the questions.

CALCULATORS MUST NOT BE USED IN THIS PAPER.

All answers should be given in their simplest form.

You must show all the relevant working to gain full marks and you will be given marks for correct methods even if your answer is incorrect.

The number of marks is given in brackets [] at the end of each question or part question.

The total number of marks for this paper is 40.

This document consists of 8 printed pages.

Formula List

For the equation	$ax^2 + bx + c = 0$	$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$
Curved surface area, A, of cylir	nder of radius r, height h.	$A = 2\pi rh$
Curved surface area, A, of cone	e of radius r, sloping edge l.	$A = \pi r l$
Curved surface area, A, of sphe	ere of radius r.	$A = 4\pi r^2$
Volume, V , of pyramid, base an	rea A, height h.	$V = \frac{1}{3}Ah$
Volume, V , of cylinder of radiu	s r, height h.	$V = \pi r^2 h$
Volume, V , of cone of radius r ,	height <i>h</i> .	$V = \frac{1}{3}\pi r^2 h$
Volume, V , of sphere of radius	Γ.	$V = \frac{4}{3}\pi r^3$
B A b a a		$\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$ $a^2 = b^2 + c^2 - 2bc \cos A$ $\operatorname{Area} = \frac{1}{2}bc \sin A$

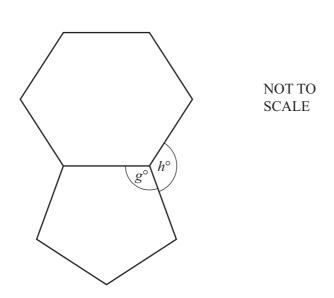

Answer all the questions.

1 Insert brackets in these calculations so that the answers are correct.

(a)
$$10 - 4 + 3 + 2 = 5$$
 [1]

(b)
$$10 - 5 \times 7 + 2 = 45$$

2

The diagram shows a regular hexagon and a regular pentagon.

(a) Find g.

Answer(a) g =[3]

(b) Find *h*.

Answer(b) h = [2]

[1]

	Answer(a)	
(b)	$8^{-\frac{2}{3}}$.	
	Answer(b)	1
(a)	3023 is a prime number.	
	Write down the factors of 3023.	
	Answer(a)	
(b)	p and q are prime numbers.	
	(i) Write down the highest common factor (HCF) of p and q .	
	Answer(b)(i)	

Find the value of

(a) 5^0 ,

3

4

(ii) Write down an expression, in terms of p and q, for the lowest common multiple (LCM) of p and q.

Answer(b)(ii) [1]

[1]

[2]

[1]

[1]

2

5 (a) Solve this inequality.

$$3(x+2) > 5x-2$$

(b) Show your answer to part (a) on this number line.

6 Sanjay asks a random sample of 200 students how they travel to school. These are his results.

Method of travel	Walk	Cycle	Bus	Car	Train
Frequency	52	47	62	27	12

(a) Find the relative frequency of a student travelling by bus.

Answer(a) [1]

- (b) The school has 1200 students.
 - (i) Explain why it is reasonable to use your answer to **part** (a) as the probability that a student chosen at random from the school travels by bus.

Answer(b)(i) [1]

(ii) Estimate the number of students in the school who travel by bus.

Answer(b)(ii) [1]

- 7 31 students took a test which was marked out of 70. The stem and leaf diagram shows their results.

 - (a) Find the median.

 Answer(a)
 [1]

 (b) Another student took the test later.
 What mark did this student get if

 (i) the median and range do not change,
 [1]

 (ii) the median and range both increase by 1?
 [1]

 (iii) the median and range both increase by 1?
 [1]

8 In standard form, $x = a \times 10^5$ and $y = b \times 10^7$ where a < b.

In standard form, $\frac{x}{y} = c \times 10^d$ where $1 \le c < 10$.

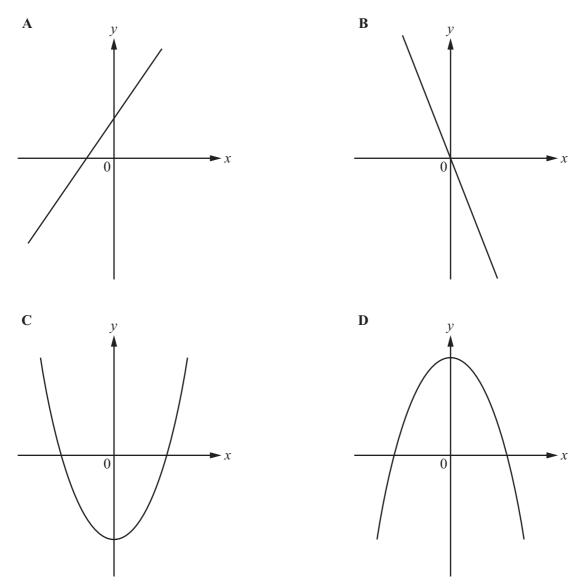

(a) Find the value of *d*.

Answer(a) [1]

(b) Find c in terms of a and b.

 $Answer(b) \ c =$ [2]

Each of the graphs represents one of these equations.

$y = x^2 + 3x$	y = 3 - 2x	$y = 3 - x^2$	y = 2x + 3
$y = x^2$	y = -3x	$y = x^2 - 3$	y = 3x

From the equations above, write down which one represents each graph.

Answer Graph A y = Graph B y = Graph C y = Graph D y =[4]

Questions 10 and 11 are printed on the next page.

10 (a) Factorise completely.

$$8a^2 - 50b^2$$

Answer(a) [3]

(b) Write as a single fraction, simplifying your answer.

$$\frac{2}{2x-3} + \frac{3}{x-5}$$

Answer(b) [3]

11 (a) Find $\log_2 8$.

Answer(a) [1]

(b) Find p when $\log 3 + 2\log 5 = \log p$.

Answer(b) p = [2]
