Cambridge International Advanced Subsidiary and Advanced Level

MARK SCHEME for the March 2016 series

9706 ACCOUNTING

9706/32

Paper 3 (A Level Structured Questions), maximum raw mark 150

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the March 2016 series for most Cambridge IGCSE[®] and Cambridge International A and AS Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

Page 3	3	Mark Scheme		Syllabus	Paper
		Cambridge International AS/	A Level – March 2016	9706	32
	W	orkings			
	1	Depreciation on property Allocated to production Allocated to administration	\$400 000 × 5% = \$20 000 \$20 000 × 70% = \$14 000 \$20 000 × 30% = 6000		
	2	Depreciation on manufacturing plan	t and machinery (\$350 000 – \$230 000) × 209	% = \$24 000	
	3	Depreciation on office equipment	\$120 000 × 15% = \$18 000		
	4	Year end unrealised profit	\$186 000 × 1 / (5 + 1) = 31 0	00	
	5	Water and electricity Allocated to production Allocated to administration	\$14 000 + 1500 = \$15 500 \$15 500 × 80% = \$12 400 \$15 500 × 20% = \$3100		
(c)	Re	esponses could include:			
	tra pr	transfer price includes unrealised profit transfer price less unrealised profit represents the cost of finished goods prudence concept inventory valued at the lower of cost and net realisable value IAS 2			
	(1	mark) × three valid points			[3]
(d)	Re	esponses could include:			
	nc	guments for 'should not continue' t acceptable for external reporting e % of mark-up is subjective			
	Arguments for 'should continue' production department continues to be treated as profit centre facilitates pricing cost of production department is better controlled compare efficiency, reward efficient managers facilitates a system of responsibility accounting				
	(m	ax 2 \times 3 marks (1 mark for stating and nax 3 for arguments for should continue	e	ation	
		ax 3 for arguments for should not conti mark for recommendation	inue)		[7]
				[Total: 25]

Ρ	age	4		rk Scheme		Syllabus	Paper
			Cambridge Internatio	nal AS/A Level	– March 2016	9706	32
2	(a)	(i)	1250 ÷ 50 = \$25 (1)				[1]
		(ii)	(3050 × 1000/100) (1) – 25	000 (1) – 4000 (1	l) = \$1500 (1of)		[4]
	(b)	(i)		Canairan			
				Consignm \$	ent account		\$
			Goods on consignment Bank (freight) Sumit (import duties)	25 000 (1) 4 000 (1) 1 500 (1of)	Sumit (sales) Balance c/d		4 000 (1) 3 050 (1)
			Sumit (commission) Consignment profit	10 800 (1of) <u>15 750</u> (1of)			7 050
			Balance b/d	<u> </u>			1 000
							[8]
		(ii)		Sumit	account		
				\$	account		\$
			Consignment a/c (sales)	54 000 (1)	Consignment a/c (impo duties)	ort	1 500 (1)of
					Consignment a/c (commission)	1	0 800 (1)of
					Bank	2	6 800 (1)
				54 000	Balance c/d		4 900 (1of) 4 000
			Balance b/d	14 900 (1of)			
							[6]

(c) Chin should make this change (1) of decision

This would reduce costs (1) and hence increase profit on consignment (1) by 11 (1) \times \$160 = \$1760 (1of)

Increased risk (1) Demand may fall (1) resulting in unsold inventory (1)

Finance may be required to buy all the inventory in one go (1) Borrowing may increase during the year (1) There may be an opportunity cost of surplus funds (1)

On average radios would stay in inventory much longer (1) with risk of obsolescence (1) or theft/damage (1)

Sumit might not be able to organise adequate storage space (1) with inventory holding costs and might require a higher rate of commission to cope with the added responsibility (1)

1 mark for decision Max 2 for calculation Max 3 for discussion

[6]

[Total: 25]

Page 5	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – March 2016	9706	32

3 (a) Equity and liabilities section of the Statement of financial position at 31 December 2015

	\$
Equity and liabilities	
Equity	
\$0.50 ordinary shares	300 000 (1)
5% \$0.25 Non-redeemable preference shares	25 000
Share premium	150 000 (1)
Retained earnings	<u>(3 000)</u> (1)
Total equity	472 000
Non-current liabilities	100 000 (1)
Current liabilities Total equity and liabilities	<u>10 000</u> (1) 582 000

(b) (i) dividend cover (144 000 - 2000) = 142 000 / 54 000 (1) = 2.63 times (1)

- (ii) gearing ratio 125 000(1) / 572 000 × 100 = 21.85% (1)of
- (iii) return on capital employed 192 000 / 572 000(1)of × 100 = 33.57% (1)of

(c) Johnson plc has a higher dividend cover (1), a lower ordinary dividend per share (1) of \$0.09
(1) and a lower earnings per share (1) of \$0.24 (1) but a lower gearing ratio (1) a higher return on capital employed (1)
This means that Johnson plc is not borrowing as much from external sources proportional to the amount of capital employed compared to Samuel plc (1). Samuel has more risk. (1)
The capital the company is being used more efficiently as there is a greater return (1)
However the ordinary dividends could only be paid out of profits 2.63 times compared to 2.1 times for Samuel plc. (1). Max 9

(d) The amount of dividend on ordinary shares is variable with the level of profits therefore for short term return Samuel plc may be better as the dividend return is much better (1) as is the earnings per share (1) Better in short term (1) However Johnson plc has borrowed less from external sources (1) and is using its capital employed to achieve a greater return. (1) so may be better for long term growth (1)

Recommendation either Samuel or Johnson (1) Max 4 marks for justification 1 mark for recommendation

Page 7	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – March 2016	9706	32

(d) Advice. (1)

Benefits – limited liability (1), easier to change ownership through shares (1), easier to raise capital (1), shareholders can be paid in dividends (1) and some customers / suppliers prefer dealing with companies rather than partnerships (1).

Limitations – stricter rules (1), more paperwork (1) and higher accountancy costs (1). Divorce of ownership and control (1).

Max 2 benefits + 2 limitations

mark for stating + 1 mark for development of each benefit and limitation.
 mark for advice

Mark-up 50%	\$160	\$99	
Unit selling price	\$480 (1of)	\$297 (1of)	
			[2]

(c) Responses could include:

more accurate cost information to management for decision making, i.e. pricing can monitor the efficiency of various activities allocation of overhead is more fair because it is based on the activities consumed, not on an arbitrary allocation (i.e. labour hours) can also allocate non-manufacturing overhead, i.e. administrative support.

Accept any reasonable alternative

(1 mark) × 1 benefit

(f) Responses could include:

the market price of the products the impact on the profit the impact on the customers/demand the effect on competition

Accept any reasonable alternative

 $(2 \text{ marks}) \times 3 \text{ explanations}$

(g) Responses could include:

Should change/should not change (1) recommendation Jumal Limited set the selling price on cost-plus base, therefore accurate cost information is very important.

Comparing the traditional approach with activity based costing approach, if traditional approach is adopted, Alpha is under-costed (Alpha consumes a higher level of resources) while Beta is over-costed (Beta consumes a lower level of resources). This is the consequence of subsidisation.

The problem of product under costing and over costing gives rise to a wrong selling price setting.

Accept any reasonable alternative

(2 marks) × explanation 1 mark for recommendation

	Manufacturing costs	1 184 000			
	Gross profit	888 000 (1)of			
	•	、 /			[

(b) Responses could include:

Flexible budget facilitates variance analysis Comparison with the actual result is more meaningful if the budget is at the same activity level of the actual result. What the budget will be if the actual output is known? In contrast with static budget which is prepared at the beginning of the budget period, flexible budget is prepared at the end of the budget period. This facilitates comparing the actual result for control purpose. More realistic.

Accept any reasonable alternative

 $(1 mark) \times 2 reasons$

(c) (i) Direct materials price (\$12 × 22 850 kg) - \$269 000 = \$5200(1) (F) (1)

- (ii) Direct materials usage
 (7500 × 3 kg 22 850 kg) × \$12 = \$4200(1) (A) (1)
- (iii) Fixed overhead expenditure \$256 000 - \$250 000 = \$600 091) (F) (1)
- (iv) Fixed overhead volume (8000 units – 7500 units) × 4 hours × \$8 = \$16 000 (1)(A) (1)
