Paper 2 Structured Questions

May/June 2019

MARK SCHEME

Maximum Mark: 90

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2019 series for most Cambridge IGCSE™, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **14** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks
4(e)	<p>Recommend: The changes are not worthwhile. (1)</p> <p>Because:</p> <p>Although budgeted contribution is higher, the profit after the changes is lower (1), due to allocated fixed costs increasing – advertising and sales bonus. (1)</p> <p>The margin of safety is lower (1) which means there is less of a buffer / comfort zone before Wye starts to make a loss. (1)</p> <p>The break-even point is higher (1) which increases the risk (1) of Wye not making enough sales to cover fixed costs. (1)</p> <p>Accept other valid points.</p> <p>(1 mark) × any 4 reasons – Max 4</p>	
4(f)	<p>Possible answers:</p> <p>Identify underperforming products (1)</p> <p>Ensure sufficiently skilled labour is available to meet production (1)</p> <p>Ensure sufficient finance is available to continue operations and any planned investments (1)</p> <p>Ensure the correct quality/cost of material / discounts can be obtained from suppliers (1)</p> <p>Be able to adapt to changes in the future / provides alternatives if financial targets are not being met (1)</p>	4

Question	Answer	Marks
4(f)	Price products competitively (1) Avoid 'firefighting' / avoid potential problems in the future (1) Assess any competition / markets for products (1) Estimate the likely future position of business – short term and long term (1) Identify areas of responsibility of managers (1) (1 mark) × any 4 advantages Accept other valid points.
