This document consists of **16** printed pages.

Scenario 1
Questions 1, 2 and 3

*For
Examiner's
Use*

Mary is the new ICT director of a multi-national company which constructs flight simulators.

She has to manage the installation of a network in a new building. The new network will have several computers and will need to communicate with other departments all over the world.

She will need to consider:

- the hardware requirements for the network
- the security of the network
- the network protocols

1 (a) Identify and state the purpose of **four** network devices which could be used in the new network.

Scenario 2
Questions 4 and 5*For
Examiner's
Use*

The North India Motor Company is a manufacturer of cars. The manufacture of these cars involves obtaining components such as car seats, engines, body shells, wheels and windows and assembling them on a production line.

Iqbal, the chief designer, has been given the task of designing and producing a prototype of a new family car. To help him do this he will make use of CAD/CAM.

The company also has a service department so that owners can bring the cars back if there are problems. The service department uses an expert system for diagnosis.

4 (a) Describe **four** ways that a Gantt chart would help in the project management of the construction of the cars on the production line.

Scenario 3
Questions 6, 7, 8 and 9

A regional government has introduced ICT services for use by its staff and the general public. There is a website for the public to access its services which includes online job applications, education opportunities and health facilities.

The government uses a telephone call centre for market research. The call centre uses Computer Telephony Integrated software (CTI). It also uses a DBMS to produce reports on the use of the CTI system.

The chief executive of the region is investigating ways of using ICT to communicate with the managers in different parts of the region so that managers do not have to travel.

Some areas of the region have limited or no access to ICT services and the people living there may not have ICT skills.

6 Describe, giving examples, **three** services that the regional government site could provide users of its website.
