## MARK SCHEME for the May/June 2013 series

## 9713 APPLIED INFORMATION AND COMMUNICATION TECHNOLOGY

9713/12

Paper 1 (Written A), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	Pag	je 2	Mark Scheme	Syllabus	Paper			
			GCE AS/A LEVEL – May/June 2013	9713	12			
(a	a)	Six from:						
		Discrete p	process control					
	1	Three from	n:					
		Specific ta	asks are performed (by the robotic arm)					
			/off or stop/start process					
		Fitting the wheels on a car is an example/wheels are fitted by robots						
		Robots sto						
		Next car comes along and the process is repeated						
		Continuou	is process control					
		Three from						
		•	rocesses which appear to be unending					
			le is the maintaining of temperature					
			onfined area					
		Keeping ti	he temperature at a comfortable level for workers and i	ODOIS				
(	b)	Six from:						
		lt's a prop	ortional–integral–derivative algorithm					
		Used whe	n preset value is a constant					
		PLC stores preset value of temperature						
			ure is input from sensors					
			gic statements is used					
			es the PLC to make proportional changes to the temper	rature				
		•	ching the compressor on for short periods of time					
			s used to compare temperature with a pre-set value					

PID calculates difference between the input value and the preset value If below, PLC switches heating element on/switches off compressor for a short time If above, PLC switches heating element off/switches on compressor for a short time PLC/PID checks the difference again If still below, PLC switches heating element on for a short time If still above, PLC switches off compressor for a short time If still above, PLC switches off compressor for a short time Until preset value is reached

## 2 (a) Two from:

Grippers Vacuum/suction cups

## (b) Three from:

Spray guns/sprayer to paint the <u>car</u> body Polishers/finishers to produce a shiny finish (after painting) Sanders to prepare body for painting Cameras to inspect/check work

		GCE AS/A LEVEL – May/June 2013	9713	12	
(c)	Four from:   (The programmer) controls the robot by <u>physically</u> guiding the arm through each step   The programmer has sensors attached to his/her arm   The sensors transmit data to the computer   The computer stores the sequence of movements   as a program in its memory				
(d)	Four from				
	Initial con Initial rec Maintena Initial con	rchase of robots st of installation dundancy payments ance costs st of paying programmers e-training		[4]	
(e)	Two from:				
	The work Jobs are	fer/less dangerous/less hazardous environment for hum areas are cleaner less boring /e to lift heavy weights	ans	[2]	
3 (a)	Three fro	om:			
		tion enables the systems analyst to see the process as a wh k – explanation of the 'Hawthorne effect'	nole		
	Interviews Benefit – Interviewer can move away from their 'script' and ask a more in-depth question if particular response is given/can interpret body language			question if a	
	Drawback – <b>One</b> from: Users have to be available at the time the systems analyst wants to interview them/may no have the time/can take a long time to interview all the users Interviewees might try and provide answers which they think the interviewer wants to hear				
	Questionnaires Benefit – <b>One</b> from: Answers tend to be, on the whole, more accurate Everyone can complete the questionnaire at the same time instead of one after the other (a with interviews)/can complete it at their leisure Drawback – it is very difficult to ask further questions based on the response to another question/ <u>can be anonymous</u> and so may not be taken seriously by user				
	Benefit – determin	ng documents - helps to identify the inputs and outputs of the system/ve ed/processing can be deduced ck – can take a long time to collate documents	olume of data c	an be <b>[9]</b>	

Page 4		Mark Scheme	Syllabus	Paper
		GCE AS/A LEVEL – May/June 2013	9713	12
(b)	Two from	n:		
	Using ( <b>tv</b>	v diagrams vo from:) terminators, processes, flow arrows and stores nts inputs, outputs and processing	5	
	<b>Two</b> from	n:		
	Using pa Represe	lowcharts rticular input, output, storage and processing symbols nts inputs, outputs and processing t used for DFDs)		[4]
(c)	<b>One</b> fact	or for each item from:		
	The volu	ng the required hardware me of data determines the choice of hardware or that data will be output affects the choice of storage de	evices	
	The user The outp	g data collection forms/screen layouts requirements influences the format ut required from system influences the design ctures affect the design		
	The form	<i>g validation routines</i> of input affects these structure affects these		
	The data	<i>g the required file structure</i> structures/programming depend on the types of proces structure depends on the input and output structures	sing	[4]
4 (a)	Two from	n:		
		hich contains unique data/no value occurs more than on ne foreign key in the other table	ice/is the prima	ry key in one [ <b>1</b> ]
	In this ex	ample the ISBN		[1]
(b)	Three fro	om:		
	Between The bool	ships will be designed using the key field the two tables/separate tables (shop data table and the books data table will be used as a foreign key in the linked table		[3]
				[*]

Р	age 5	Mark Scheme	Syllabus	Paper
		GCE AS/A LEVEL – May/June 2013	9713	12
(c	) Three fr	om:		
	Data is r	not repeated		
		rage capacity needed		
		expand		
		y needs to be amended once		
		produce reports with cross-tabular data rather than sep	oarate files	
		egrity is maintained		
	(If data v	vas duplicated) hackers would have easier access to da	ta	[
(a	) Two from	n:		
	Sort cod			
	Account			
	Date of I			
		es of memorable data		
	Full nam Post coo			[
	F 051 COU			I
(b	) Three fr	om:		
	Phone ta	apper/Hacker can only get hold of three characters in on	e go	
		apper/Hacker might need to know the whole password to	•	
		apper/Hacker would need to intercept password several	-	
	Will prot	bably be different three characters asked for at next log i	n	[
(c	) Three fr	om:		
	It asks th	ne caller to select from a menu		
		ne caller to enter information using a keypad		
		ne caller to enter information by answering yes/no/saying	g words	
	lt transla	tes key presses through the tones produced by the pho	ne	
		s spoken words using speech recognition		
		ceiving data it gives the balance of the account		
	Call can	be directed to an operator		[
(d	) <b>Two</b> from	n:		
		e a long time to navigate through the menus/may be in a	queue <u>if you w</u>	ant to speal
	with an o			
		nus might provide too many/too few options th information may be provided at the beginning of the c	all	
		ompts might be hard to understand		

Voice prompts might be hard to understand IVR may not understand your accent/voice

	Page 6		Mark Scheme	Syllabus	Paper
			GCE AS/A LEVEL – May/June 2013	9713	12
6	(a)	Three from:			
		Employ f Save cos Lower ru Less like	ests as) don't have to rent so many high street premises rewer staff therefore less paid in staff wages sts of printing/sending statements nning costs, fewer branches so less electricity, heating a lihood of the bank being robbed ney is spent on security staff	and lighting	[3]
	(b)	Two from	n:		
			undancy payments		
		Cost of buying equipment Cost of installing system/paying systems analyst/programmers/web designers (to set up we			
		site) Some st	aff will need to retrain (which is costly)		[2]
	(c)	Four fro	n		
		Can ban Can ban Can ask Interest i Doesn't	no queuing in online banking k at any time of day or night k anywhere in the world <u>providing you have Internet acc</u> for a loan over the Internet without being embarrassed rates on savings accounts tend to be higher have to worry about whether the mail will get bill paymer less likelihood of robbery/no likelihood of violence		es on time [ <b>4</b> ]
7	(a)	Three fro	om:		
		Insuranc Governn Tourism Educatic Social se	nent		[3]
	(b)	Three fro	om:		
		Other fea flyers/po Always o point/flye	ge of multimedia - sound, video/animation, unlike posters atures e.g. slide transition effects, special text effects, in sters on while mall is open/the user cannot switch it off – web ers can be thrown away an target your audience better than slide show	nage transition,
