

### **Cambridge International Examinations**

Cambridge International Advanced Subsidiary and Advanced Level

BIOLOGY 9700/34

Paper 34 (Advanced Practical Skills 2)

May/June 2017

MARK SCHEME
Maximum Mark: 40

#### **Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2017 series for most Cambridge IGCSE®, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

 ${\it \circledR}$  IGCSE is a registered trademark.

#### Mark scheme abbreviations

; separates marking points

alternative answers for the same point

R reject

A accept (for answers correctly cued by the question, or by extra guidance)

**AW** alternative wording (where responses vary more than usual)

<u>underline</u> actual word given must be used by candidate (grammatical variants accepted)

max indicates the maximum number of marks that can be given

**ora** or reverse argument

**mp** marking point (with relevant number)

ecf error carried forward

I ignore

Question	Answer	Marks
1(a)(i)	1 at least 4 more concentrations;	3
	2 correct volumes of 10M;	
	3 volumes of <b>10M</b> and <b>W</b> add up to 10;	
1(a)(ii)	1 table drawn + heading, percentage / % conc(entration) + (molecule) M;	5
	2 heading, time + s;	
	3 records, times for at least 4 concentrations;	
	4 correct trend in results;	
	5 (for times) whole numbers only;	
1(a)(iii)	records as whole number + correct unit;	1
1(a)(iv)	correct estimate for their results + %;	1
1(a)(v)	1 more/wider/narrower range of concentrations or named examples;	3
	2 concentrations between named concentrations or within range they have stated in and (a)(ii) and (a)(iv);	
	3 draw graph + explain how to read off graph;	
1(b)(i)	1 (x-axis) concentration of solution of molecule <b>M</b> (/) µg cm <sup>-3</sup> + (y-axis) inhibition area (/) mm <sup>2</sup> ;	4
	2 (scale for x-axis): 20 to 2 cm, labelled each 2 cm + (scale for y-axis) 20 to 2 cm, labelled each 2 cm;	
	3 correct plotting of 6 points;	
	4 6 plots joined point to point drawn as a ruled thin line;

correct estimate + mm <sup>2</sup> using candidates graph;	1
bacteria has not, multiplied / grown or bacteria, killed / destroyed;	1
max 2 1 correct reference to cell, wall/membrane; 2 cell/bacterial lysis or cells/bacteria burst;	2
<ul> <li>idea of inhibition of transcription / translation / protein synthesis;</li> <li>idea of inhibition of cell division;</li> <li>acts as an enzyme inhibitor;</li> </ul>	
6 idea of inhibiting DNA replication / synthesis;	21
	bacteria, killed / destroyed;  max 2  1 correct reference to cell, wall / membrane;  2 cell / bacterial lysis or cells / bacteria burst;  3 idea of inhibition of transcription / translation / protein synthesis;  4 idea of inhibition of cell division;  5 acts as an enzyme inhibitor;

Question		Answer	Marks
2(a)(i)	1	states 4 measurements (T, L1, P, Q and L2);	3
	2	L1 and L2 have to be smaller values than P and Q;	
	3	measurement of $T$ = sum of other measurements;	
2(a)(ii)	1	uses measurements of epg units T + P or Q (whichever is smaller);	3
	2	Larger number to smaller number;	
	3	To lowest common denominator;	
2(a)(iii)	1	minimum size at least 90 mm + at least 3 lines + no shading;	5
	2	No cells + at least one vascular bundle + correct section drawn;	
	3	correct proportion of palisade to whole depth of leaf;	
	4	epidermis drawn as two lines + one epidermis thinner than the other;	
	5	uses one label line + one label to the palisade layer;	
2(a)(iv)	1	quality of line for outer wall of cells (thin line) + minimum size at least 40 mm across largest cell + no shading;	5
	2	only four cells drawn in a line, each cell touching at least one other cell;	
	3	cell wall drawn as two lines close together;	
	4	shows inclusion in at least one cell	
		or cells drawn with convex walls ;	
	5	uses one label line + one label to cell wall;
