BUSINESS

Paper 1 Short Answer and Essay MARK SCHEME Maximum Mark: 40

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the March 2020 series for most Cambridge IGCSE[™], Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of 17 printed pages.

9609/12 March 2020

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit
 is given for valid answers which go beyond the scope of the syllabus and mark scheme,
 referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Marks are awarded for each answer when the following Assessment Objectives (AO) are met. The mark scheme for each answer indicates when and how each AO can be met.

AO1 Demonstrate knowledge and understanding of business concepts.

The focus in **Section A** of the Examination Paper is on this first AO.

- (a) **Questions 1**, **2**, and **4** will meet this AO using definitions and explanations of business concepts.
- (b) Question 3 provides an opportunity for the application and a more developed explanation of a business concept. The 4–5-mark level specifically provides for this more developed explanation.

In **Section B** of the Examination Paper

(a) Questions 5, 6, and 7 still require supporting Knowledge and Understanding (AO1), but there is now a focus on Application (AO2), Analysis (AO3), and Evaluation (AO4). These skills are set out below:

AO2 Apply knowledge and understanding of business concepts to general and specific situations and contexts.

- (a) Where a specific business or context is named in the question then the candidate is required to relate answers specifically to this business or context.
- (b) It is not sufficient to merely repeat the name of the business or the context.

AO3 Analyse business problems, issues, situations and contexts, through a discussion and interpretation of evidence, debate, theory, impact and consequence, to produce reasoned and coherent arguments.

(a) Level 3 answers will likely use terms such as - because, leads to, therefore, so that, as a result, consequently – thereby showing analytical development for AO3.

AO4 Limited Evaluation is given

- (a) When an attempt is made, (probably in a concluding section of an answer), to address and comment on the value and validity of the previous analysis.
- (b) These comments may be quite brief and be more opinionated than reasoned.
- (c) A mere concluding summary of preceding analysis is, however, <u>not</u> evaluation.

AO4 Evaluation occurs

- (a) When an answer comments on the validity/significance of previous analysis in an evidence based and reasoned way.
- (b) This often leads to the presentation of appropriate substantiated judgements, decisions, or recommendations.

9609 Paper 11, 12 and 13 Annotations and their Use

Annotation	Use
~	As an indication of relevant and rewardable content. Better to put these in the body of the answer.
NAQ	Used when the answer or parts of the answer are not answering the question asked.
BOD	Used when the benefit of the doubt is given in order to reward a response.
TV	Used when parts of the answer are considered to be too vague.
К	Indicates knowledge and understanding of the concepts and issues relating to the question.
APP	Indicates that general business application has been shown in the response.
CON	Indicates that the specific context of the question has been addressed.
X CON	A combination of X and CON. Used at the end of an answer to indicate that context has not been addressed.
AN	Indicates where the answer has demonstrated analysis.
EVAL	Indicates where the answer has demonstrated evaluation.
REP	This indicates where content has been repeated.
Х	Only used in combination with CON as above.
SEEN	Indicates that content has been recognised but not rewarded.

Note: For Section A Questions 1, 2 and 4 only the following applies.

An incorrect definition for **Part (a)** due to a misinterpretation of the question is given 0 marks.

If that misinterpretation also applies to **Part (b)** a maximum of 2 marks may be awarded if the answer is relevant and is developed based on the incorrect answer to **Part (a)**.

Cambridge International AS & A Level – Mark Scheme PUBLISHED

Question	Answer	Marks
1(a)	Define the term 'Product Life Cycle'.	2
	The pattern of sales recorded by a product.[1]Steps from launch to withdrawal from the market[1]It describes the stages a product goes through.[1]Introduction to removal from the market.[1]From when it is was first thought of until it is finally removed from the market.[1]One of the main forms of product portfolio analysis.[1]Shows a product's performance in the market.[1]Life expectancy of a product / journey a product is on.[1]At least two correct stages of a product life cycle named.[1]A correctly labelled diagram.[2]	
	Sound definition – 2 of the factors listed above [2 marks]	
	Partial definition – 1 of the factors listed above [1 mark]	
	No creditable content [0 marks]	
1(b)	Explain <u>two</u> ways a business could extend a product's life cycle.	3
	Answers could include:	
	Business extension strategies include	
	 selling in new geographical markets, e.g. exporting the product. creating a version of the product targeted at different segments. repackaging the product to be more eye-catching. rebranding with a new name and image. relaunching the product with a promotional campaign. finding new uses for the product, e.g. Lucozade. adding value by including more features, e.g. specification of a smartphone. using reduced (penetration) price or offers to discount the price. advertising to try to gain a new audience or remind the current audience. 	
	Accept any other valid response.	
	Sound explanation of two ways a business could extend a product's life cycle. [3 marks]	
	Sound explanation of one way or partial explanation of two ways a business could extend a product's life cycle. [2 marks]	
	Partial explanation of one way a business could extend a product's life cycle or a list of two ways. [1 mark]	
	No creditable content [0 marks]	

Question	Answer	Marks		
2(a)	Define the term 'diversity' in a workforce.	2		
	A diverse / mixed workforce is made up of individuals with a wide range of backgrounds / characteristics / experiences.[1]Example characteristics of diversity are culture, race, ethnicity, gender, age, religion, sexual orientation.[1]Diversity relates to having differences among employees.[1]Deliberately creating an inclusive environment that values differences.[1]Showing no discrimination when hiring the workforce.[1]Acceptance / recruitment of all kinds of people.[1]All employees are safe and treated equally with no discrimination.[1]			
	Answers that focus only on employee skills / specialisation and do not refer to characteristics such as culture / race / ethnicity etc are not acceptable.			
	Sound definition – 2 of the factors listed above [2 marks]			
	Partial definition – 1 of the factors listed above [1 mark]			
	No creditable content [0 marks]			
2(b)	Explain <u>two</u> benefits to a business of employing a diverse workforce.			
	Answers could include:			
	 By employing individuals from various races, ethnicities, religions and gender the business is judged as valuing people of all diversities. Employees have specific knowledge / understanding of culturally acceptable behaviour / product types / language, etc. Helps achieve a greater consumer market as consumers due to no language barriers / cultural offence. More acceptable / effective marketing to other cultures / religions, etc. Benefit from a range of language skills, which allows them to provide products and services internationally due to the ease of communication. Helps expansion into other countries. Gives improved opportunities to gain international supply links. Gains in creativity because individuals from different backgrounds approach problem solving in different ways leading to innovative products. Can choose from large pool of job applicants are well qualified for the role. Employing a more qualified workforce with a wide range of skills as the business is seen as a welcoming place to work. Reduces employee turnover as every employee feels valued / supported. 			
	Accept any other valid response.			

Question	Answer		
2(b)	Award BOD for answers that present logical benefits to a business of having a range of specialised / skilled / flexible employees. (1 mark for each benefit – maximum 2 marks).		
	Sound explanation of two benefits to a business of employing a diverse workforce. [3 marks]		
	Sound explanation of one benefit or partial explanation of two benefits to a business of employing a diverse workforce. [2 marks]		
	Partial explanation of one benefit or a list of two benefits to a business of employing a diverse workforce. [1 mark]		
	No creditable content [0 marks]		

Question	Answer	Marks
3	Explain how better management of trade receivables <u>and</u> trade payables can improve cash flow.	5
	Answers could include:	
	Trade receivables (debtors who have bought goods on credit) are shown on the statement of financial position (balance sheet). They are one of the current assets.	
	Trade payables (accounts payable or creditors) are shown on the statement of financial position (balance sheet). They are one of the current (short term) liabilities. Amounts owed to a supplier for goods or services bought on account rather than for cash and who have not yet been paid.	
	Cash flow is the sum of cash payments to a business (inflows) less the sum of cash payments (outflows).	
	Explanation linked to improving cash flow	
	• If credit control encourages trade receivables to pay for their goods and services more promptly this will bring money into the business more quickly and so improve cash inflow, therefore improving overall cash flow.	
	 If a business can delay the payment of its trade payables this will keep money in the business for longer, reducing cash outflow, therefore improving overall cash flow. 	
	 The more goods the house builder can buy on credit the more they can delay the payment of trade payables until after payment of trade receivables. This will reduce cash outflows and improve the overall cash flow. 	
	Accept debt factoring as a management method.Accept keeping of good records as better management.	
	Accept any other valid response.	

Question	Answer	
3	Effective explanation of how better management of trade receivables and trade payables can improve cash flow. The fifth mark is reserved for candidates who effectively explain <u>both</u> factors. [4–5 marks] Explanation of how better management of trade receivables and/or trade payables can improve cash flow. [2–3 marks] Descriptive information about trade receivables / trade payables / cash flow. [1 mark]	
	No creditable content [0 marks]	

Question	Answer	Marks
4(a)	Define the term 'external economies of scale'.Scale of operation increases and costs reduce or benefits associated with the expansion / growth / cost reduction.[1]Result from external factors with an example such as infrastructure changes / supplier improvements / location advantages / being offered purchasing opportunities by suppliers.[1]Benefits a business gets because of the environment / economy.[1]Benefits achieved without any effort from the business / outside the control of the business.[1]Sound definition – 2 of the factors listed above[2 marks]Partial definition – 1 of the factors listed above[1 mark]No creditable content[0 marks]	2
4(b)	 Explain two internal economies of scale. <u>Purchasing economies</u> – suppliers will often offer substantial discounts for large orders (bulk buying). It is cheaper for suppliers to process and deliver one large order rather than several small ones. This makes the unit cost cheaper for the buying business. <u>Technical economies</u> – large firms more likely to produce enough products to justify installing machinery for flow production. The high capacity reduces the unit cost of production. Also, the purchase of expensive computer systems can be justified to support the high output of large firms. <u>Financial economies</u> – money can often be borrowed more easily from banks and at a lower interest rate by big businesses. Also, it is easier for a big business to raise finance by selling its shares on a stock exchange. <u>Marketing economies</u> – the cost of a sales force and promotional campaigns can be spread over a higher level of sales for a big firm so 	

Question	Answer			
4(b)	<u>Managerial economies</u> – large businesses can afford to hire specialist functional managers who operate their functional area more efficiently than non-specialist managers, thus reducing costs per unit.			
	valid answer to this question does not require a definition of conomies of scale.			
	Accept any other valid response.			
	Sound explanation of two internal economies of scale.	[3 marks]		
	Sound explanation of one or partial explanation of two internal economies of scale.	[2 marks]		
	Partial explanation of one or a list of two internal economies of so	cale. [1 mark]		
	No creditable content	[0 marks]		

Question		Answer		Marks
5(a)	Analyse the advantages of using different methods to measure the size of a business.			
	Level	Description	Marks	
	4	Good analysis of the advantages of using different methods to measure the size of a business.	7–8	
	3	Some analysis of the advantages of using different methods to measure the size of a business.	5–6	
	2	Some application of methods to measure the size of a business.	3–4	
	1	Knowledge and understanding of business size.	1–2

		could include: ge and Understanding		
	Clear	r understanding of business size.		
	Applicati	ion		
	• Refe	rence to methods to measure the size of a business.		
	Analysis			
	giveTheseach	e are several ways of measuring the size of a business w different results and may suggest different advantages. e advantages (and possibly limitations) may be reference method is described and analysed. Intages may be identified in a concluding section.	•	

Question	Answer	Marks
5(a)	Different methods to measure the size of a business include:	
	 <u>Number of employees</u> – can be used to judge the size of similar businesses but capital-intensive business can be very large without employing a large number of employees. 	
	• <u>Revenue</u> – useful when comparing firms in the same industry but some businesses may sell high value products while others sell low value products, so the measurement is skewed.	
	 <u>Capital employed</u> – the amount of capital investment needed for the business to function. Larger businesses will need to employ more capital to buy the assets needed to run. 	
	• <u>Market capitalisation or share capital</u> – the number of issued shares × the market price of each share. Only applies to limited companies. A public limited company will have more share capital than a private limited company due to selling shares on a stock market.	
	 <u>Market share</u> – used to compare businesses in the same market. Can be based on total value or total volume of goods sold. Shows the sales of a business as a proportion of all sales of that type of product. 	
	 <u>Number of outlets</u> – a large business would have more shops than a small business, possibly being a national or international chain rather than existing in a localised area. 	
	 <u>Analysis of advantages of using different methods</u> Using one or a limited number of measures could give a misleading picture. Using only value of output or value of sales when comparing business that sell different products. 	
	Accept any other valid response.	

Question		Answer		Marks		
5(b)		whether a partnership is the best legal structure for a ncy business.	an	12		
	Level	Description	Marks			
	4	Effective evaluation of whether a partnership is the best legal structure for an accountancy business.	9–12			
	3	Limited evaluation of whether a partnership is the best legal structure for an accountancy business.	7–8			
	2	Application and analysis of whether a partnership is the best legal structure for a business.	3–6			
	1	Knowledge and understanding of partnership / legal structure.	1–2			
	0	No creditable content	0			
	Answers	could include:				
	Knowled	ge and Understanding				
		understanding of partnership. understanding of legal structure.				
	Applicati	on				
	 Reference busin 	ence to whether a partnership is the best legal structure ess.	for a			
	Analysis					
	mone	al – partners provide start-up capital. More partners mea y in the business, so better flexibility / potential for grown is more potential profit, equally shared between the part	th. This			
	than	<u>bility</u> – easier to form, manage and run and less strictly recompanies. Partners (not shareholders) decide how the so have more flexible management.	•			
		ed Responsibility – allows partners to use their abilities. I ork according to skills and specialise more than a sole tr				
		ion Making – is shared and partners can help each othe ed. More business ideas and better problem solving.	r out when			
	Disag of par	reements – different ideas on how the business runs. preements and disputes might harm the business and rel rtners. Deed of partnership reduces risk and gives proce reements.	•			

Question	Answer			
5(b)	• <u>Agreement</u> – all partners must agree which can restrict management of the business. Sole traders free to decide what they want. In limited companies the directors must follow the will of the shareholders.			
	 <u>Unlimited liability</u> – each partner shares liability and financial risks. May put off potential partners. LLP benefits from advantages of limited liability, with the flexibility of the partnership model. 			
	 <u>Taxation</u> – partners pay tax like sole traders and are self-employed. They pay higher personal taxation than they would in a limited company. 			
	 <u>Profit Sharing</u> – Partners share profits equally, regardless of respective efforts. 			
	Evaluation			
	 The context is an accountancy (small financial services) business. This could be shown by reference to the services offered by this type of business. Candidates may question what the term 'best legal structure' means. Does it mean the best structure for successful performance / for the owners / for that type of business / for the consumers? Might success depend on different skills of partners, the amount of capital injected into the partnership, the degree of co-operation on decision-making? Might a partnership prove limiting leading to the move to a private limited company. Is there a need to gain limited liability by become a Ltd or PLC business? Will the factors influencing success of a business such as quality of management, motivation and morale of employees, core competencies within the business be more easily supplied by becoming a PLC. 			
	Accept any other valid response.
