Paper 1 Short Answer and Essay MARK SCHEME Maximum Mark: 40

Published

Students did not sit exam papers in the June 2020 series due to the Covid-19 global pandemic.

This mark scheme is published to support teachers and students and should be read together with the question paper. It shows the requirements of the exam. The answer column of the mark scheme shows the proposed basis on which Examiners would award marks for this exam. Where appropriate, this column also provides the most likely acceptable alternative responses expected from students. Examiners usually review the mark scheme after they have seen student responses and update the mark scheme if appropriate. In the June series, Examiners were unable to consider the acceptability of alternative responses, as there were no student responses to consider.

Mark schemes should usually be read together with the Principal Examiner Report for Teachers. However, because students did not sit exam papers, there is no Principal Examiner Report for Teachers for the June 2020 series.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the June 2020 series for most Cambridge IGCSE[™] and Cambridge International A & AS Level components, and some Cambridge O Level components.

This document consists of **13** printed pages.

9609/12 May/June 2020

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question •
- the standard of response required by a candidate as exemplified by the standardisation scripts. •

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded positively:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit • is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do •
- marks are not deducted for errors
- marks are not deducted for omissions •
- answers should only be judged on the quality of spelling, punctuation and grammar when these • features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

9609 Paper 1: Specific Marking Principles

Marks are awarded for each answer when the following Assessment Objectives (AO) are met. The mark scheme for each answer indicates when and how each AO can be met.

AO1 – Demonstrate knowledge and understanding of business concepts.

The focus in Section A of the Examination Paper is on this first AO.

- (a) Questions 1, 2, and 4 will meet this AO using definitions and explanations of business concepts.
- (b) Question 3 provides an opportunity for the application and a more developed explanation of a business concept. The 4–5-mark level specifically provides for this more developed explanation.
- In <u>Section B</u> of the Examination Paper
- (a) Questions 5, 6, and 7 still require supporting Knowledge and Understanding (AO1), but there is now a focus on Application (AO2), Analysis (AO3), and Evaluation (AO4). These skills are set out below:

AO2 – Apply knowledge and understanding of business concepts to general and specific situations and contexts.

- (a) Where a specific business or context is named in the question then the candidate is required to relate answers specifically to this business or context.
- (b) It is not sufficient to merely repeat the name of the business or the context.

AO3 – Analyse business problems, issues, situations and contexts, through a discussion and interpretation of evidence, debate, theory, impact and consequence, to produce reasoned and coherent arguments.

(a) Level 3 answers will likely use terms such as – because, leads to, therefore, so that, as a result, consequently – thereby showing analytical development for AO3.

AO4 – Limited Evaluation is given

- (a) When an attempt is made, (probably in a concluding section of an answer), to address and comment on the value and validity of the previous analysis.
- (b) These comments may be quite brief and be more opinionated than reasoned.
- (c) A mere concluding summary of preceding analysis is, however, <u>not</u> evaluation.

AO4 – Evaluation occurs

(a) When an answer comments on the validity/significance of previous analysis in an evidence based and reasoned way.

This often leads to the presentation of appropriate substantiated judgements, decisions, or recommendations.

Question	Answer	Marks
1(a)	Define the term 'job description'.A list of the key tasks/duties/responsibilities. (1)Of a job advertised and to be filled. (1)Sound definitionPartial definitionNo creditable content(0 marks)	2
1(b)	 Explain two advantages to an employer of using a person specification. Answers could include: To give an outline of the type of person the business is looking for to fill a position. To make applicants aware of the skills they should have if they apply for the job. To state which skills/qualities are essential and which are merely desirable To deter unsuitable people from applying: This would give the advantage to an employer of not receiving unsuitable applications. This would save time reading applications from unqualified applicants. The recruitment period could be significantly shortened Recruitment costs would be reduced. Sound explanation of two advantages to an employer of using a person specification. (3 marks) Sound explanation of one advantage or a partial explanation of two advantages. (2 marks) Understanding of a person specification (1 mark) No creditable content 	3

Question	Answer	Marks
2(a)	Define the term 'private sector'.	2
	Businesses owned and controlled by an individual or groups of individuals. (2) Not owned/controlled by the government. (1)	
	Sound definition (2 marks)	
	Partial definition (1 mark)	
	No creditable content. (0 marks)	
2(b)	Explain two advantages that a business in the public sector may have that a business in the private sector may not.	3
	 Answers could include: Possibly easier access to finance because they are funded by a government. They are not under pressure to make a profit because they are often/usually providing essential goods and/or services. They do not have to pay dividends to shareholders. They are frequently large businesses that benefit from economies of scale. 	
	Sound explanation of two advantages for a business in the public sector. (3 marks)	
	Sound explanation of one advantage or a partial explanation of two	
	advantages (2 marks)	
	Understanding of private/public sector businesses. (1 mark)	
	No creditable content. (0 marks)	

Question	Answer	Marks
3	Explain the difficulties that a small business start-up might have when trying to obtain finance from an external source.	5
	 Possible answers might include: The business will not have any past financial history to present to potential lenders. Banks might be unwilling to allow a bank loan/overdraft to an inexperienced business owner. This might depend on the previous experience of the person/people starting the business. Small businesses might find it difficult to arrange external finance because of their lack of collateral/security. They are unlikely to have many assets for security. Difficulty of persuading lenders that the business if viable if the product/service is very new to a market. 	
	Effective explanation of the difficulties that a small business start-up might have in obtaining an external source of finance. (4–5 marks) Limited explanation of the difficulties that a small business start-up might have in obtaining an external source of finance. (2–3 marks) Understanding of the difficulties of business start-up/external finance. (1 mark) No creditable content. (0 marks) Two points well developed can be rewarded in the 4–5 bracket.	

Question	Answer		Marks
4(a)	Define the term 'national market'.		2
	A business operates within one country but not overseas. (2) A business with branches and operations within one country. (2) A market within one country. (2)		
	Sound definition Partial definition No creditable content.	(2 marks) (1 mark) (0 marks)	

Question	Answer	Marks
4(b)	Explain two advantages to a business of selling in international markets.	3
	 Answers could include: An international market means that a business will target consumers at home and overseas which might give access to more customers. Can allow economies of scale to be gained allowing costs per item/service to be reduced leading to more profit. Larger scale activity than a local/national market might allow a business to offer variations to meet the needs of different consumers thus spreading risk. Overseas markets might result in new ideas for the business. Opportunity to diversify. Might avoid competing in a saturated national market. Sound explanation of two advantages to a business of selling in international markets. (3 marks) Sound explanation of one advantage or a partial explanation of two advantages. (2 marks) Understanding of an international market. (1 mark) No creditable content. 	
	advantages.(2 marks)Understanding of an international market.(1 mark)	

Question	Answer	Marks
5(a)	Analyse the disadvantages to a business of using debt factoring to improve its cash flow.	8
	Answers could include: Debt factoring is when a business sells its debts to a third party.	
	 Disadvantages: The full value of the debt is not paid by the debt factor (usually about 80% of the value of the debt is received). Debt factors usually refuse to take the long-term bad debts so the business still has debts that it might struggle to recover. Customers might not like having their debt sold to a third party because they will now have to deal with someone outside of the original business they dealt with. Customers might not want to deal with the business again. Use of debt factoring could send a signal to stakeholders that the business has liquidity problems. This could impact on the relationship of the business with its stakeholders. For example, if it is a public limited company, shareholders may begin to sell shares believing that the business is no longer a good investment.

6	'Good lead managers.	lers are more important for business success than	good	20
	Discuss th	e extent to which you agree with this view.		
	Level	Description	Marks	
	5	Effective evaluation of the view that good leaders are more important for business success than good managers.	17–20	
	4	Limited evaluation and good analysis of the view that good leaders are more important for business success than good managers.	13–16	
	3	Analysis of the view that good leaders are more important for business success than good managers.	11–12	
	2	Limited analysis, with application, of the view that good leaders are more important for business success than good managers.	5–10	
	1	Understanding of leaders/managers.	1–4	
	0	No creditable content.	0	
	 Leader A leader target of A mana and im leader. Leaders ter Charise them a Self-co get too Creativ apart fr Intellige way for recogn Managers r Plan, c of contt idea wa Effectiv manag 	ager controls and directs activity within a business and plement the means of achieving the overall objectives and to be: matic and can be persuasive when trying to get people nd believe in their ideas. nfident – believing that they can solve any problems and distracted by irrelevancies re – can devise new methods/ideas that can set the bu from its rivals. ent – can understand complex situations and determine ward in the most difficult situations. They need the inter ise and reject unsuitable ideas or solutions. nust be able to: ontrol, co-ordinate, control, command, monitor. Withou rol the ideas of the leader might fail regardless of how	towards a will devise set by the to follow nd do not siness e the best elligence to at this level good the at good	

Question	Answer	Marks
6	 However, not all leaders are good! Some leaders refuse to listen to the advice of those around them and might try to drive the business in a wrong direction. In such cases even the best managers might not be able to rescue the business. Even the best leaders need good managers to help them achieve their objectives. Candidates could equally argue strongly for either leaders or managers, rather than a more balanced approach.

Question		Answer		Marks
7(b)		e importance of process innovation for a manufact nents operating in a competitive market.	turer of	12
	Level	Description	Marks	
	4	Effective evaluation of the importance of process innovation for a manufacturer of car components operating in a competitive market	9–12	
	3	Limited evaluation of the importance of process innovation for a manufacturer of car components operating in a competitive market	7–8	
	2	Analysis and some application of the importance of process innovation for a manufacturer operating in a competitive market	3–6	
	1	Understanding of process innovation/competitive market	1–2	
	0	No creditable content.	0	
	Possible an	swers might include:		
	production	novation is the implementation of new or significantly in or service delivery methods. This might be as simple a om batch to flow production.		
	matching or	ve market requires businesses to be constantly aware r exceeding the offerings of their competitors to consur n might be in terms of product innovation, quality and/c	mers.	
	customers of	he process by which components are produced and de can be important by enabling the business to reduce th comers and to improve the quality of what is offered to	ne delivery	
	 Reduce totally r of autor comport buying finished 		ig the use e car o will be of the	
	for cust and priv	se the speed of production which leads to a shorter wa tomers. Increasingly consumers want fast delivery, bot vate customers. Car manufacturers increasingly using d reliable suppliers of components.	h business	

Question	Answer	Marks
7(b)	 However: Competing on price might be difficult because of the high initial cost of some process innovation. If competition is on quality, then there might be benefits to be gained. The importance can depend on the strength of the individual component manufacturer in that competitive market. If the business is one of the more dominant businesses in the market, then process innovation might be essential for that dominance to be maintained and for repeat orders. If the business is a smaller business, then the relative costs might be too high when compared to the possible gains to be made. In the motor industry, constant process innovation is essential to remain in the market. Competition to supply components to the large car producers is high.
