CANDIDATE NUMBER

--	--	--	--

**MATHEMATICS**

**9709/11**

Paper 1 Pure Mathematics 1

**October/November 2024**

**1 hour 50 minutes**

You must answer on the question paper.

You will need: List of formulae (MF19)

## INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

## INFORMATION

- The total mark for this paper is 75.
- The number of marks for each question or part question is shown in brackets [ ].

This document has **20** pages. Any blank pages are indicated.

- In the expansion of  $\left(kx + \frac{2}{x}\right)^4$ , where  $k$  is a positive constant, the term independent of  $x$  is equal to 150.  
Find the value of  $k$  and hence determine the coefficient of  $x^2$  in the expansion. [4]

2 The curve  $y = x^2 - \frac{a}{x}$  has a stationary point at  $(-3, b)$ .

Find the values of the constants  $a$  and  $b$ .

[4]

Dotted lines for writing answers

3

The diagram shows a sector of a circle, centre  $O$ , where  $OB = OC = 15$  cm. The size of angle  $BOC$  is  $\frac{2}{5}\pi$  radians. Points  $A$  and  $D$  on the lines  $OB$  and  $OC$  respectively are joined by an arc  $AD$  of a circle with centre  $O$ . The shaded region is bounded by the arcs  $AD$  and  $BC$  and by the straight lines  $AB$  and  $DC$ . It is given that the area of the shaded region is  $\frac{209}{5}\pi$  cm<sup>2</sup>.

Find the perimeter of the shaded region. Give your answer in terms of  $\pi$ . [5]

6 Circles  $C_1$  and  $C_2$  have equations

$$x^2 + y^2 + 6x - 10y + 18 = 0 \text{ and } (x - 9)^2 + (y + 4)^2 - 64 = 0$$

respectively.

(a) Find the distance between the centres of the circles. [4]

.....

.....

.....

.....

.....

.....

.....

.....

11 The function  $f$  is defined by  $f(x) = 3 + 6x - 2x^2$  for  $x \in \mathbb{R}$ .

- (a) Express  $f(x)$  in the form  $a - b(x - c)^2$ , where  $a$ ,  $b$  and  $c$  are constants, and state the range of  $f$ . [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (b) The graph of  $y = f(x)$  is transformed to the graph of  $y = h(x)$  by a reflection in one of the axes followed by a translation. It is given that the graph of  $y = h(x)$  has a minimum point at the origin.

Give details of the reflection and translation involved. [2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

The function  $g$  is defined by  $g(x) = 3 + 6x - 2x^2$  for  $x \leq 0$ .

- (c) Sketch the graph of  $y = g(x)$  and explain why  $g$  is a one-one function. You are **not** required to find the coordinates of any intersections with the axes. [2]

.....

.....

.....

- (d) Sketch the graph of  $y = g^{-1}(x)$  on your diagram in (c), and find an expression for  $g^{-1}(x)$ . You should label the two graphs in your diagram appropriately and show any relevant mirror line. [4]
