Paper 3 Advanced Practical Skills 1

October/November 2019

CONFIDENTIAL INSTRUCTIONS

This document gives details of how to prepare for and administer the practical exam.

The information in this document and the identity of any materials supplied by Cambridge International are confidential and must NOT reach candidates either directly or indirectly.

The supervisor must complete the report at the end of this document and return it with the scripts.

If you have any queries regarding these confidential instructions, contact Cambridge International stating the centre number, the syllabus and component number and the nature of the query.

fax +44 1223 553558

This document consists of 7 printed pages and 1 blank page.

General information about practical exams

Centres must follow the guidance on science practical exams given in the *Cambridge Handbook*.

Safety

Supervisors must follow national and local regulations relating to safety and first aid.

Only those procedures described in the question paper should be attempted.

Supervisors must inform candidates that materials and apparatus used in the exam should be treated with caution. Suitable eye protection should be used where necessary.

Before the exam

- The packets containing the question papers must **not** be opened before the exam.
- It is assumed that standard school laboratory facilities, as indicated in the *Guide to Planning Practical Science*, will be available.
- Spare materials and apparatus for the tasks set must be available for candidates, if required.

During the exam

- It must be made clear to candidates at the start of the exam that they may request spare materials and apparatus for the tasks set.
- Where specified, the supervisor **must** perform the experiments and record the results as instructed. This must be done **out of sight** of the candidates, using the same materials and apparatus as the candidates.
- Any assistance provided to candidates must be recorded in the supervisor's report.
- If any materials or apparatus need to be replaced, for example, in the event of breakage or loss, this must be recorded in the supervisor's report.

After the exam

- The supervisor must complete a report for each practical session held and each laboratory used.
- Each packet of scripts returned to Cambridge International must contain the following items:
 - the scripts of the candidates specified on the bar code label provided
 - the supervisor's results relevant to these candidates
 - the supervisor's reports relevant to these candidates
 - seating plans for each practical session, referring to each candidate by candidate number
 - the attendance register.

Specific information for this practical exam

The supervisor must be a teacher of Physics or other competent physicist. During the exam, the supervisor (NOT the invigilator) should obtain a sample set of numerical results by following the relevant steps in the question paper. The results should be clearly labelled 'Supervisor's results' and recorded on the supervisor's report or on a spare copy of the question paper.

Organisation of the exam

- The number of sets of apparatus provided for each experiment should be $\frac{1}{2}N$, where N is the number of candidates taking the exam.
- Candidates should not be provided with any additional apparatus beyond that specified in these instructions.
- Candidates should be allowed access to the apparatus for each experiment for one hour only.
- After spending one hour on one experiment, candidates should change over to the other experiment.
- The order in which a candidate attempts the two experiments is immaterial.

Assistance to candidates

- Candidates should be informed that, if they find themselves in real difficulty, they may ask the supervisor for practical assistance, but that the extent of this assistance will be reported to the Examiner, who may not award full credit for the relevant skills.
- Assistance should only be given when it is asked for by a candidate or where apparatus is seen to have developed a fault.
- Assistance should be restricted to enabling candidates to make observations and measurements. Observations and measurements must **not** be made for candidates, and no help should be given with data analysis or evaluation.
- In cases of faulty apparatus that prevent the required measurements being taken, the supervisor should allow extra time to give the candidate a fair opportunity to perform the experiment as if the fault had not been present.
- Any assistance or extra time given to candidates must be recorded in the supervisor's report.

Materials and apparatus for Question 1 (per set of apparatus unless otherwise specified)

- 1.5V dry cell with terminals.
- Digital voltmeter with range 0–2V (or 0–2000mV) reading to the nearest 0.001V (or 1mV). If a digital multimeter is used, the range should be fixed and any unused terminals should be covered.
- Resistors of resistance 10 Ω , 12 Ω , 15 Ω , 18 Ω , 22 Ω , 27 Ω , 33 Ω and 39 Ω . See Note 1.
- Two component holders for resistors. One holder should be labelled P and the other holder should be labelled Q.
- Metre rule with a millimetre scale. See Note 2.
- 105 cm length of 36 swg (or 0.19 mm diameter) constantan wire. See Note 2 and Note 3.
- Two crocodile clips. See Note 4.
- Ten connecting leads.
- Switch.
- Small container for the resistors.

Notes

- 1 The resistors should have a minimum power rating of 0.25W and a maximum tolerance of 5% (e.g. RS Components stock number 386-468). Each resistor should be labelled with its resistance value.
- 2 The wire should be attached to the metre rule as shown in Fig. 1.1. The wire should be firmly taped and as free from kinks as possible.

**Fig. 1.1**

- 3 If this wire is not available, other resistance wire of approximate resistance 15 Ωm^{-1} such as 32 swg (or 0.27 mm diameter) nichrome wire may be used.
- 4 The jaws of the crocodile clips should be cleaned so that they make a good electrical contact with the resistance wire.
- 5 The apparatus should be laid out on the bench. If the apparatus is to be used by another candidate, then it should be dismantled and restored to its original state.

Materials and apparatus for Question 2 (per set of apparatus unless otherwise specified)

- Two stands each of height at least 60 cm.
- Three bosses.
- Clamp.
- Two pendulums. See Note 1.
- Rubber band with approximate circumference in the range 10–15 cm.
- Metre rule with a millimetre scale.
- Stop-watch reading to 0.1 s or better.
- Split cork.
- Two wooden rods each with approximate diameter 12 mm and approximate length 15 cm.

Notes

- 1 One of the pendulum bobs should be attached to a piece of string of approximate length 60 cm.

The other bob should be attached to a string of approximate length 50 cm as shown in Fig. 2.1. This string should have a loop at the end with approximate circumference 6 cm.

Fig. 2.1 (not to scale)

- 2 The apparatus should be laid out on the bench. If the apparatus is to be used by another candidate, then it should be dismantled and restored to its original state.

Supervisor's report

Syllabus and component number

				/		
--	--	--	--	---	--	--

Centre number

--	--	--	--	--

Centre name

Time of the practical session

Laboratory name/number

Give details of any difficulties experienced by the centre or by candidates (include the relevant candidate names and candidate numbers).

You must include:

- any difficulties experienced by the centre in the preparation of materials
- any difficulties experienced by candidates, e.g. due to faulty materials or apparatus
- any specific assistance given to candidates.

Declaration

- 1 Each packet that I am returning to Cambridge International contains the following items:
 - the scripts of the candidates specified on the bar code label provided
 - the supervisor's results relevant to these candidates
 - the supervisor's reports relevant to these candidates
 - seating plans for each practical session, referring to each candidate by candidate number
 - the attendance register
- 2 Where the practical exam has taken place in more than one practical session, I have clearly labelled the supervisor's results, supervisor's reports and seating plans with the time and laboratory name/number for each practical session.
- 3 I have included details of difficulties relating to each practical session experienced by the centre or by candidates.
- 4 I have reported any other adverse circumstances affecting candidates, e.g. illness, bereavement or temporary injury, directly to Cambridge International on a *special consideration form*.
